

## Criteria of total certification of students

### Criteria of Assessment of Knowledge in PEDIATRIC SURGERY of the Faculty of Foreign Students (taught in English)

Grades of knowledge mastering	Points and marks	Criteria and values of assessment
<b>The first grade - simple recognition</b>	<b>1</b>	Lack of knowledge, refusal to answer any question.
	<b>2</b>	Mastering of some notions, facts. No answers to lecturer's direct questions.
	<b>3</b> <b>Mark — poor (unsatisfactory)</b>	Superficial, fragmentary mastering of learned material. Handling of some notions, facts. Rough mistakes (1-2), not completely corrected after lecturer's additional questions.
<b>The second grade - automatic, subconscious reproduction</b>	<b>4</b> <b>Mark - satisfactory</b>	Incomplete reproduction of learned material with low degree of understanding.. Reproduction of mastered definitions, terms, information. Few mistakes (1-2) rapidly corrected after additional questions of a lecturer.
	<b>5</b> <b>Mark —Fair</b>	Incomplete reproduction of the learned material without generalizations and findings. Few mistakes (1-2) corrected with lecturer's aid.
<b>The third gradeconscious reproduction</b>	<b>6 Quite good</b>	Full reproduction of the curriculum learned material. A few negligible mistakes.
	<b>7</b> <b>Mark — Good</b>	Full reproduction of the curriculum learned material with some negligible mistakes (1-2). Ability of scientific terms and information handling.
<b>The fourth grade - learned material using and handling in familiar situation</b>	<b>8</b> <b>Mark — Very Good</b>	Full reproduction of the curriculum learned material demonstrating systematized deep knowledge. Learned material handling in a typical situation. Ability to solve complex problems independently.
	<b>9</b> <b>Mark — Excellent/ passed or tested</b>	Full reproduction of the curriculum learned material showing deep knowledge. Argument with the use of information from additional literature. Learned material handling in typical situations. Demonstration of cognitive activity.
<b>The fifth grade — learned material using</b>	<b>10</b> <b>Mark — with distinction</b>	Learned material free perfect handling, giving many examples and showing deep knowledge. Argument with the use of information from additional literature. Demonstration of cognitive activity.

**and handling 1  
in unfamiliar  
situation**

Participation in student's research. Ability to solve independently complex medical problems in new situations.

**For computer knowledge test** points and grades are given by the following criteria: Up to 20% of correct answers - 1 point - grade 1- failed;  
21 - 59% of correct answers - 2 points - grade 1 - failed;  
60 - 64% of correct answers - 3 points - grade 1 - failed;  
65 - 69% of correct answers - 4 points - grade 2- tested or passed;  
70 - 79% of correct answers - 5 points - grade 2;  
80 - 84% of correct answers - 6 points - grade 3;  
85 - 90% of correct answers - 7 points - grade 3;  
91 - 94% of correct answers - 8 points - grade 4;  
95 - 99% of correct answers - 9 points - grade 4;  
100% of correct answers - 10 points - grade 5.
