УТВЕРЖДАЮ Зав. кафедрой фтизиопульмонологии к.м.н., доцент Е.Н. Алексо 01.09.2020

CREDIT QUESTIONS FOR THE $6^{\rm TH}$ YEAR STUDENTS OF MEDICAL FACULTY OF FOREIGN STUDENTS GRODNO STATE MEDICAL UNIVERSITY 2020 - 2021 YEARS

tuberculosis. Diagnosis and examination methods of patients with tuberculosis. The main X-ray syndromes in TB. Tuberculous intoxication: differential diagnosis. Primary tuberculosis complex: differential diagnosis. TB of intrathoratic lymph nodes (Tuberculous bronchoadenitis): differential diagnosis. Miliary TB: differential diagnosis with acute bilateral small foci pneumonia, carcinomatosis. Miliary TB: differential diagnosis with acute bilateral small foci pneumonia, carcinomatosis. Disseminated pulmonary tuberculosis. Differential diagnosis with pulmonary sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, post-traumatic, systemic connective tissue disorders, pulmonary embolism.	1	
 Diagnosis and examination methods of patients with tuberculosis. The main X-ray syndromes in TB. Tuberculous intoxication: differential diagnosis. Primary tuberculosis complex: differential diagnosis. TB of intrathoratic lymph nodes (Tuberculous bronchoadenitis): differential diagnosis. Miliary TB: differential diagnosis with acute bilateral small foci pneumonia, carcinomatosis. Disseminated pulmonary tuberculosis. Differential diagnosis with pulmonary sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	1	The causative agents of tuberculosis (MBT), its properties. Transmission of
The main X-ray syndromes in TB. Tuberculous intoxication: differential diagnosis. Primary tuberculosis complex: differential diagnosis. TB of intrathoratic lymph nodes (Tuberculous bronchoadenitis): differential diagnosis. Miliary TB: differential diagnosis with acute bilateral small foci pneumonia, carcinomatosis. Bisseminated pulmonary tuberculosis. Differential diagnosis with pulmonary sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		
Tuberculous intoxication: differential diagnosis. Primary tuberculosis complex: differential diagnosis. TB of intrathoratic lymph nodes (Tuberculous bronchoadenitis): differential diagnosis. Miliary TB: differential diagnosis with acute bilateral small foci pneumonia, carcinomatosis. Bisseminated pulmonary tuberculosis. Differential diagnosis with pulmonary sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of fibro-cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		
 Primary tuberculosis complex: differential diagnosis. TB of intrathoratic lymph nodes (Tuberculous bronchoadenitis): differential diagnosis. Miliary TB: differential diagnosis with acute bilateral small foci pneumonia, carcinomatosis. Disseminated pulmonary tuberculosis. Differential diagnosis with pulmonary sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 		· ·
TB of intrathoratic lymph nodes (Tuberculous bronchoadenitis): differential diagnosis. Miliary TB: differential diagnosis with acute bilateral small foci pneumonia, carcinomatosis. Disseminated pulmonary tuberculosis. Differential diagnosis with pulmonary sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of fibro-cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		diagnosis.
Disseminated pulmonary tuberculosis. Differential diagnosis with pulmonary sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of fibro-cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,	7	Miliary TB: differential diagnosis with acute bilateral small foci pneumonia,
sarcoidosis,, alveolitis. Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Infiltrative pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of flung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		carcinomatosis.
 Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis, congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	8	Disseminated pulmonary tuberculosis. Differential diagnosis with pulmonary
congestion in the lungs. Differential diagnosis of tuberculous meningitis and TB of the central nervous system. Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		sarcoidosis,, alveolitis.
10 Differential diagnosis of tuberculous meningitis and TB of the central nervous system. 11 Focal pulmonary TB. Differential diagnosis with pneumonia. 12 Infiltrative pulmonary TB. Differential diagnosis with lung cancer. 13 Differential diagnosis of infiltrative pulmonary TB and lung abscess. 14 Differential diagnosis of infiltrative pulmonary TB and pneumonia. 15 Caseous pneumonia. Differential diagnosis with lobar pneumonia. 16 Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. 17 Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. 18 Differential diagnosis of lung cavity - cavernous tuberculosis. 19 Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. 20 Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. 21 Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. 22 Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,	9	Disseminated pulmonary tuberculosis. Differential diagnosis with silicosis,
nervous system. 11 Focal pulmonary TB. Differential diagnosis with pneumonia. 12 Infiltrative pulmonary TB. Differential diagnosis with lung cancer. 13 Differential diagnosis of infiltrative pulmonary TB and lung abscess. 14 Differential diagnosis of infiltrative pulmonary TB and pneumonia. 15 Caseous pneumonia. Differential diagnosis with lobar pneumonia. 16 Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. 17 Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. 18 Differential diagnosis of lung cavity - cavernous tuberculosis. 19 Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. 20 Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. 21 Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		congestion in the lungs.
 Focal pulmonary TB. Differential diagnosis with pneumonia. Infiltrative pulmonary TB. Differential diagnosis with lung cancer. Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	10	Differential diagnosis of tuberculous meningitis and TB of the central
12 Infiltrative pulmonary TB. Differential diagnosis with lung cancer. 13 Differential diagnosis of infiltrative pulmonary TB and lung abscess. 14 Differential diagnosis of infiltrative pulmonary TB and pneumonia. 15 Caseous pneumonia. Differential diagnosis with lobar pneumonia. 16 Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. 17 Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. 18 Differential diagnosis of lung cavity - cavernous tuberculosis. 19 Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. 20 Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. 21 Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. 22 Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		nervous system.
 Differential diagnosis of infiltrative pulmonary TB and lung abscess. Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	11	Focal pulmonary TB. Differential diagnosis with pneumonia.
 Differential diagnosis of infiltrative pulmonary TB and pneumonia. Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	12	Infiltrative pulmonary TB. Differential diagnosis with lung cancer.
 Caseous pneumonia. Differential diagnosis with lobar pneumonia. Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	13	Differential diagnosis of infiltrative pulmonary TB and lung abscess.
 Lung tuberculoma. Differential diagnosis with peripheral lung cancer, hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	14	Differential diagnosis of infiltrative pulmonary TB and pneumonia.
hydatid cyst, pneumonia. Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,	15	Caseous pneumonia. Differential diagnosis with lobar pneumonia.
 Differential diagnosis of lung tuberculoma with benign tumors in the lung, cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	16	Lung tuberculoma. Differential diagnosis with peripheral lung cancer,
cysts, aspergilloma. Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		hydatid cyst, pneumonia.
 Differential diagnosis of lung cavity - cavernous tuberculosis. Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	17	Differential diagnosis of lung tuberculoma with benign tumors in the lung,
 Differential diagnosis of fibro-cavernous tuberculosis with chronic lung abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 		cysts, aspergilloma.
abscess, destructive cancer. Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,	18	Differential diagnosis of lung cavity - cavernous tuberculosis.
 Differential diagnosis of fibro-cavernous tuberculosis with single and multiple cysts in the lungs, bronchoectasis. Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	19	Differential diagnosis of fibro-cavernous tuberculosis with chronic lung
multiple cysts in the lungs, bronchoectasis. 21 Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. 22 Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		abscess, destructive cancer.
 Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis. Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, 	20	Differential diagnosis of fibro-cavernous tuberculosis with single and
22 Differentsial diagnosis of pleural effusions: pneumonic, tumor, tuberculosis,		multiple cysts in the lungs, bronchoectasis.
	21	Differential diagnosis of cirrhotic tuberculosis with pleuritic, athelectasis.
post-traumatic, systemic connective tissue disorders, pulmonary embolism.	22	
		post-traumatic, systemic connective tissue disorders, pulmonary embolism.
