TIMETABLE of the practical classes for the 6th year students of Medical Faculty of Foreign Students

Working in a hospital.
Each student observes 3-4 patients under the supervision of a doctor and a teacher. Examination and analysis of patients with a teacher, participation in consultations. Seminars with oral discussions, analysis of X-rays of pulmonary tuberculosis patients, decision of the situational tasks.

Day 1
1.1. General principles for the differential diagnosis of pulmonary tuberculosis- 1h.
1.2. Sarkoidosis of respiratory system (epidemiology, etiology, pathology anatomy, immunology, classification, clinical picture, diagnosis, treatment, prognosis - 3hs.
1.3. Differential diagnosis of pulmonary disseminations: miliary and disseminated pulmonary tuberculosis, acute bilateral small focal pneumonia, carcinomatosis, pulmonary sarcoidosis, silicosis, congestion in the lungs, alveolitis, - 2 hs.
1.4. Differential diagnosis of infiltrative-pneumonic changes in the lungs: infiltrative pulmonary tuberculosis and caseous pneumonia, lobar, allergic pneumonia. - 1h
1.5. Work with the teacher in the department - 1 h

Day 2
2.2. Differential diagnosis of spherical formations in the lungs: focal tuberculosis, peripheral lung cancer, benign tumors in the lung, hydatid cyst, aspergilloma, pneumonia. - 2 hours
2.3. Differential diagnosis of lung cavity: cavernous and fibro-cavernous tuberculosis, chronic lung abscess, single and multiple cysts in the lungs, cancer. - 2 hours.
2.4 Palliative treatment of patients with tuberculosis (indications, methods)-1h
2.5 Work with the teacher in the department - 1 hour

Day 3
3.1. Infection control of TB (tuberculosis transmission, administrative control, classification of risk zones, the engineering control - objectives, methods, personal respiratory protection -1h.
3.2. Algorithm for detection of tuberculosis in the modern E-period-1h
3.3. Differential diagnosis of pleural effusions: pneumonic, tumor, tuberculosis, post-traumatic, systemic connective tissue disorders, pulmonary embolism - 2 hours
3.4. Decision of situational problems - 1 hour
3.5 Credit - 2h
Control Work of students: Social and low aspects in the treatment of tuberculosis - 1h.

Head of the Department of Phthisiopulmonology,
MD PhD, Associate Professor
