

Extracurriculum activities (Socio-political, ideological and cultural work)

At the 1st Department of surgical diseases conducted information and educational hours with students on the topics recommended by the Department of educational work with young people. Teachers of the Department actively participate in student groups on topical issues of life of the University, city, country, ethics and medical deontology, participate in all social, political and cultural events that are held at the University.

Responsible for the organization of ideological and educational work at the 1st Department of surgical diseases is Ass. Professor K.S. Belyuk.

Plan of ideological and educational work for 2018-2019 academic year:

Employees of the Department are actively involved in the supervision of students 1, 2 courses in order to adapt to the conditions of study, creating a cohesive team of training groups, the organization of ideological and educational work.

In the course of the curation, interactive methods are used (energizers, games for acquaintance, brainstorming, work in small groups, "openwork saw", etc.). Students get acquainted with each other, as well as express the problems and describe the situations that they have faced in everyday life.

The results of the trainings were the improvement of the psychological climate in the groups, as well as the increase of social activity of students.

Employees of the Department take an active part in the life of the University, in all socio-political and cultural events.
