

TYPICAL ACADEMIC PLAN
for practical classes
for the **2nd** semester for students of the 1st course
THE FACULTY OF FOREIGN STUDENTS

№	Topics of the practical classes	№ of the week
1. 2.	The oral cavity. The tongue. Teeth. Salivary glands. The pharynx, oesophagus. R-anatomy. The abdominal cavity. The areas of the front abdominal wall.	1
3. 4.	The stomach. R-anatomy. The small intestine The large intestine. R-anatomy of the bowels. The spleen.	2
5. 6.	The liver. The pancreas. The peritoneum. Topography of the levels of the peritoneum.	3
7. 8.	The nasal cavity. The larynx. The trachea, bronchi, lungs. Branhiogenic group of the edocrine glands	4
9. 10.	<u>Control class on digestive system.</u> <u>Control class on digestive system.</u>	5
11. 12.	The pleura. Topography of lungs and pleura. Mediastinum. The kidneys. Adrenal glands. Age particularities. Ureters..	6
13. 14.	The Urinary bladder. Female urethra. The testicles. The epididymis testis. Ductus spermaticus. Vesiculae seminales. Spermatic cord and covers of testicles. The prostate gland.	7
15. 16.	The internal female sexual organs. The external male sexual organs. The male urethra. The external female sexual organs. The pudendum femininum. The perineum.	8
17. 18.	The heart. The conducting system of the heart. The heart vessels. Topography of the heart. R-anatomy of the heart. Pericardium.	9
19. 20.	<u>Control classes on respiratory and urogenital system.</u> <u>Control classes on respiratory and urogenital system.</u>	10
21. 22.	The vessels of the pulmonary (lesser) circulation. Ascending aorta. The aortic arch. Truncus brachiocephalicus. The common and external carotid arteries. Internal carotid and subclavian arteries..	11
23. 24.	Axillary and brachial artery.. Arteries of the forearm and hand.	12
25. 26.	The descending part of aorta: thoracic and abdominal aorta. The iliac and femoral artery.	13
27. 28.	The popliteal artery. The arteries of the leg and foot. The system of vena cava superior. The sinuses of the dura mater.	14
29. 30.	<u>THE CONTROL CLASS CARDIOVASCULAR SYSTEM</u> <u>THE CONTROL CLASS CARDIOVASCULAR SYSTEM</u>	15
31. 32.	The system of the inferior vena cava and portal vein. Portocaval and cava-caval anastomoses. Fetal blood circulation.	16
33. 34.	The lymphatic system (general data). Lymphatic vessels, nodes and ways of the lymph outflow from the lower limbs, pelvis and abdominal cavity. The lymphatic vessels, nodes and ways of the lymph outflow from the wall and organ of the thoracic cavity, head, neck and the upper limbs.	17
35. 36.	The final class on lymphology and venous system. END-OF TERM FOR THE II SEMESTER.	18

The Head of
Normal Anatomy Department

F.G. Gadzhieva
