

THE PLAN

of General Chemistry course lectures for the students of general
medicine faculty and foreign students faculty
in the I semester of 2018-2019 academic year.

(lecture duration — 2 hours)

№	Lecture topic
1	Elements of chemical thermodynamics and bioenergetics
2	Chemical equivalent. The law of equivalents
3	Colligative properties of aqueous solutions
4	Buffer solutions
5	Complex (coordinate) compounds
6	Electrochemistry. Electrode potentials
7	Chemical kinetics and catalysis
8	Surface phenomena
9	Physico-chemistry of disperse systems

Head of General and Bioorganic
Chemistry Department,
associate professor (docent)

V.V. Boltromeyuk
