- 14 Preparation and rules of distribution of various forms of medicines.
- 15 The technique of laying the ointment under the eyelid.
- 16 Methods of application of suppositories.
- 17 General inspection of patient
- 18 Determination of the body mass index (BMI).
- 19 Registration of temperature measurement results.
- 20 Determination of the breath rate.
- 21 The use of individual inhaler
- 22 The collection of sputum for sputum test.
- 23 Rules for the use of the nebulizer.
- 24 Carrying oxygen therapy by different methods.
- 25 Rules of using of peakflowmeters and registration of the results in medical documentation.
- 26 Care of the tracheostomy.
- 27 Determination of peripheral edema and ascites.
- 28 Determination of the water balance.
- 29 Palpation of the pulse.
- 30 Method of measurement of blood pressure.
- 31 Technique of ECG registration.
- 32 First aid for patients with syncope, collapse, shock.
- 33 Insertion of the oral and nasogastric tubes into the stomach.
- 34 Gastroenteric tube feeding of the patient.
- 35 Gastric lavage with a tube.
- 36 Feeding the patient through a gastrostomy.
- 37 Care of a gastrostomy.
- 38 Features of feeding elderly and senile patients. Feeding patients with self-care deficiency and motor activity disorders.
- 39 Care of the colostomy.
- 40 Assistance in case of vomiting.
- 41 The method of the feces collection for the stool test.
- 42 The technique of the cleansing, siphon, medicinal enema.
- 43 Preparation of patients for x-ray examination of the stomach, intestines, gallbladder and biliary tract.
- 44 Diuresis. Measurement of daily diuresis.
- 45 Collection of urine for laboratory testing using a catheter.
- 46 The method of urine collection for detection of 24-hour glucose level.
- 47 Equipment for bladder catheterization.
- 48 Bladder catheterization using a Foley urological catheter.
- 49 Care for urological catheter and urinals installed for a long time.
- 50 Collect of medicines from an ampoule and a vial into a syringe.

- 51 Technique of intradermal injections.
- 52 Technique of subcutaneous injections.
- 53 Technique of intramuscular injections.
- 54 Collection blood from a vein with a syringe.
- 55 Technique of intravenous dropping infusion.
- 56 Additional introduction of medicines into the vein during intravenous dropping infusion.
- 57 Dosed administration of medicines using a syringe infusion pump.
- 58 Care for peripheral venous catheter.
- 59 Putting on tourniquet on the upper arm.
- 60 Intravenous infusion of medicines using a syringe.
- 61 Filling the system for intravenous dropping infusion.
- 62 Collection blood from a vein by S-Monovette vacuum system.
- 63 Preparation of blood for transportation to the laboratory.
- 64 Change a bottle with infusion solution.
- 65 Peripheral venous catheter placement.
- 66 Putting on a sterile labcoat and gloves.
- 67 The imposition of soft bandages.
- 68 Removal of skin sutures.
- 69 Dressing preparation.
- 70 Preparation of the operational field.
- 71 Surgical hand antiseptic.
- 72 Cover of a sterile table in a dressing room.
- 73 Care of urinary fistula.
- 74 Ileostomy care.
- 75 Carrying out dressing.
- 76 Care of drainages and micro-irrigators. The removal of the drainages.
