

List of practical skills

1. Preparing of disinfectants.
2. Carrying out tests on the quality of cleaning syringes and needles from the blood and washing solution.
3. Hygienic antiseptic hand: European standard EN-1500 treatment
4. Working with the medical records of the nurse.
5. An assessment of patient's functional conditions.
6. Determination of chest circumference.
7. Determination of height and weight of the patient
8. Transportation of patients
9. Changing bed-clothes.
10. Intimate washing of patient
11. Instilling eyes drops.
12. Ability to establish eye ointment for the lower eyelid of the eye tube and a spatula.
13. Care of the mouth of patient.
14. Care of the nose and the ears of patient.
15. Care of the ears of patient.
16. Instilling nose drops.
17. Instilling ears drops.
18. Body temperature measurement.
19. Registration of body temperature in temperature list.
20. Care of febrile patients.
21. Statement of the jars, mustard plasters.
22. Placing of warming compress.
23. Placing of cold compress.
24. Preparing and giving hot-water bag to patient.
25. Preparation and filing of heater and bladder with ice.
26. Carrying rubbing, application of drug to the skin.
27. The collection of a sterile syringe.
28. Set of drugs from vials and ampoules.
29. Delivery of the syringe to the patient's bed
30. Intradermal injection.
31. Subcutaneous injection.
32. Breeding antibiotics.
33. Intramuscular injection.
34. Tourniquet on his arm.
35. The method and technique of intravenous bolus.
36. The method and technique of intravenous drip infusion.
37. The method and technique of intravenous blood collection.
38. Carrying out an intravenous drop infusion.
39. Determination of breath rate.
40. Collection of sputum for laboratory testing.
41. Collection of sputum for bacteriological testing.
42. Ability to use a handheld inhaler.

43. Performance of oxygen therapy.
44. Taking a throat swab for bacteriological examination.
45. Water balance, its registration
46. Determination of pulse rate.
47. Blood pressure measurement.
48. First aid in vomiting.
49. Gastric lavage.
50. Submission of the bed-pan to the patient.
51. Performance of a cleansing enema.
52. Stool samples for bacteriological tests.
53. Determination of the water balance.
54. The collection of urine for laboratory examination.
55. Submission of a patient urinal.
56. Catheterization of male.
57. Catheterization of female.
58. Change of bed and underwear seriously ill.
59. Treatment of bedsores.
