Things to Remember while choosing a RESEARCH TOPIC

- While choosing a research topic, make sure that the subject lies within your area of interest.
- Interesting research topics can be easily found on news websites -- Read scores of online newspapers and there will be several interesting articles which can be taken up as research topics.
- Double check if a strong hypothesis can be made on the subject. Moreover, check if the subject has enough content available online.
- Keep three to four research topics in hand before initiating the research. You may encounter unforeseen obstacles and may have to change the topic. That is why it becomes necessary to have some extra topics in hand and be flexible about change at this stage.
- Do not hurry with the research, as this can make a mess. First collect secondary data from the Internet about your topic and then head out for primary data, if necessary.
- Collecting primary data or first hand information will always give your research a more realistic touch. It will also add value to your paper. So don't hesitate to go forward and collect your own findings.
